

INTEGRIDERM®

PRESSURE REDISTRIBUTION MATTRESSES
BY MIP

The COVID-19 pandemic has heightened infection control practices within the healthcare community. Our line of Integriderm pressure redistribution mattresses will help support your infection prevention and control protocols.

MATTRESS KEY FEATURES:

Technostat Anti-Bacterial Filter enables mattress to breathe while preventing possible contamination

Moisture Resistant Welded Handles help promote staff safety with out of sight design and reduce potential bacterial infiltration

Respurtex 4-way stretch, breathable and fully closed cover design makes it easy to disinfect and helps protect patient's skin against shearing
