MIP9000V/BR

HIGHLIGHTS

Recommended for care recipients needing deep cushioned comfort with full body support. Offers an additional layer to maximize redistribution at critical body zones for treatment of pressure injuries up to Stage II. The visco elastic foam topper enhances the quality of life for the care recipient.

DIMENSIONS

35" x 80" x 7"

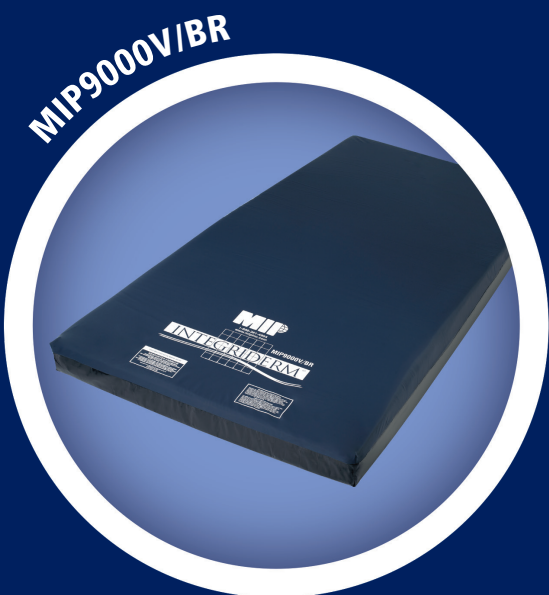

Available in 78", 80", or 84" standard mattress lengths and custom sizes

MAXIMUM WEIGHT CAPACITY

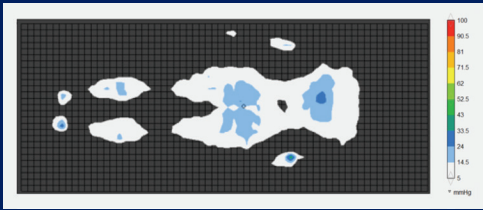

375 lbs

WARRANTY

7 Years

PRESSURE MAPPING

Cross Die-Cut Visco-Elastic Gel Infused Topper

- Enhances patient comfort
- Minimizes shear during ingress and digress

Maximized Sleeping Surface

- Topper is full width of mattress for added sleeping surface
- Reduces discomfort when sleeping on or near edge of mattress

Cross Die-Cut Support Layer

- Improves air flow and reduces heat build-up

Higher Grade of Foams Throughout Mattress

- Provides increased support
- Prolongs life of the mattress

Moisture Resistant Welded Handles

- Promotes staff safety with out of sight design
- Reduces potential bacterial infiltration

Bolstered Rails to the Top of the Third Layer

- Increases edge support
- Provides more stability around the perimeter

Flex Points on Bolstered Rails

- Strategically positioned for adaptability when gatching bed
- Decreases risk of separation from center core

Fire Barrier Sleeve

- Mattress meets more stringent fire standards such as TB603, CAL129, BFD IX-11

Technostat Anti-Bacterial Filter

- Enables mattress to breathe while preventing possible contamination

7 Year Full Warranty

- Excellent durability for maximum cost-savings
- Cover and foam warrantied for 7 years
